

## RP-1-04 ERRATA

If you, as a user of ANSI/IESNA RP-1-04, *American National Standard Practice for Office Lighting*, believe you have located an error not covered by the following revisions, you should e-mail your information to Pat McGillicuddy at: pmcgillicuddy@ies.org or send a letter to: Pat McGillicuddy, Manager of Technology, IES, 120 Wall Street 17th Floor, New York, NY 10005. Additions will be posted to this list online as they become available. This errata list was last updated on **April 1, 2005**.

Please confine your comments to specific typographical errors or misstatements of fact in the RP-1-04 text and/or graphics. Do not attempt to revise or update the document itself.

---

● **Table B1** (*portion that appears on page 62*)

Look in **Table B1: IESNA Lighting Design**. Under the boldface Location/Task entry **Reading**, note that the row labeled **White boards** contains the letter “B” (indicating recommended illuminance category “B”) in the column labeled **Illuminance (Vertical) Category or Value (lux)**. However, the correct recommendation at this point in **Table B1** should be category “D” as category “B” is too dim for the associated location/task.

Seven illuminance categories (A through G) are described and given numerical values in **Table 1: Determination of Illuminance Categories**, located on page 10 of RP-1-04.
