

**FOR IMMEDIATE RELEASE**

### **Halco Lighting Technologies® Announces New HID Ballast Kits**

**Norcross, GA. January 5, 2012** – Halco Lighting Technologies® introduces their newest HID ballast kits to the company's ProLume® magnetic HID ballast product line.

Halco has added 750W and 1000W Pulse Start and 1500W Probe Start Metal Halide ballast kits. Backed by a 2-year warranty, they are available in both four-tap and five-tap construction. These ballast kits include the capacitor and ignitor, when necessary, as well as all mounting hardware.

These new products complement Halco's strong HID ballast and lamp offering, which includes Pulse Start lamps in 750W and 1000W that are also available in Protected models for open fixture applications. Plus, Halco's 1500W standard Metal Halide lamp makes an ideal pairing with the new 1500W Probe Start ballast.

In addition to ballast kits and lamps, Halco carries a wide assortment of capacitors and ignitors to help keep HID systems properly maintained.
