LITECONTROL CONTINUES TO EVOLVE ITS COVE LIGHTING OPTIONS WITH THE NEW LED COVE-15 AND COVE-16

HANSON, MASS. - Litecontrol's newest additions to the Concealed Cove family, Cove-15 and the surface-mounted Cove-16, are LED fixtures that represent the smallest cove luminaires in the family. Measuring only 1 1/2" high and 4 1/2" wide, both the Cove-15 and Cove-16 offer replaceable LED modules, four color temperatures, three lumen and power choices and a five year warranty. The Cove-15 and Cove-16 have lenses that lie flat and are hidden from normal viewing angles, whereas most competitive products have lenses that are angled, increasing their visibility.

The Cove-15 is a conventional cove fixture in a small package, designed to fit into a field-constructed architectural cove. It is also available with an optional adjustable mounting angle, which tilts the fixture to project light out at lower beam angles. The surface-mounted Cove-16 mounts directly to the wall for the same lighting effect yet with easier installation. This fixture saves labor and material costs since a built-out architectural cove is not necessary. The housing provides a finished look and the mounting brackets offset the fixture to accommodate irregularities along the length of any wall.

The Cove-15 and Cove-16 round out Litecontrol's popular Cove Family which includes the Cove-25, available with T5 lamping and the Cove 30, available with T8 lamping. For additional information, please visit litecontrol.com.

About Litecontrol

Litecontrol has been a leading designer and manufacturer of architectural interior lighting since 1936. Litecontrol is a resource for designers, architects, and engineers to ensure their vision becomes a reality. The company is dedicated to the idea that a given space with a given purpose requires its own lighting solution whether the space is an office, school, healthcare facility or retail space.

Based in Hanson, Ma, Litecontrol designs, fabricates, paints, and assembles product at two fully integrated facilities. Litecontrol offers unparalleled customer support services before, during and after installation. For more information on Litecontrol visit litecontrol.com.
